Software engineer in Go, Python and TypeScript for trading systems and data platforms. 80+ execution algorithms at Algo Maker, Go services and data pipelines at Viasat, NSE options analytics used by 50+ developers.

Work Experience

Viasat Inc. *Software Engineer II (intern May – Aug 2022)* Remote, US · May 2023 – Dec 2025

- Built a Go microservice for monitoring servers deployed in aircraft, with the core platform team.
- Shipped API endpoints, Snowflake schema changes and Airflow DAGs for in-flight connectivity data.
- Extended the CloudFormation stack for data monitoring infrastructure; 100% unit test coverage on a shared library.

Algo Maker LLP *Full Stack Developer* Mumbai, IN · Dec 2020 – Aug 2021

- Implemented 80+ order execution algorithms, from time/price based to market making, over WebSockets at fund scale.
- Built an Angular + Express risk dashboard on MongoDB that cut risk evaluation and order entry time by 50%.
- Deployed the platform on AWS next to the broker, 20% faster order execution.

Accio.ai *Software Engineer Intern* Mumbai, IN · Apr – Sep 2018

- Built a data pipeline processing 2 million ad events a day with a searchable MongoDB analytics schema.
- Designed the REST API for ad payment reporting; automated design uploads with the AWS SDK, minutes to seconds.

Freelance *Full Stack Developer* 2016 – 2019

- Delivered Laravel, Node.js and Ionic apps for small businesses: food delivery, fleet management, dealership reporting.

Education

M.S. Computer Science *University of Massachusetts, Boston* CGPA 3.7/4 · 2021 – 2023

- Graduate Teaching Fellow, CS240 Programming in C, two semesters, classes of 51 and 67.

Projects & Open Source

Option Chain Analysis · Live NSE Nifty option chain classified by price and open interest change · Node.js 100+ stars · 2019

Broker SDKs · Kite Connect (Go), XTS v2 and 5paisa (Node.js), Hummingbot client (Python), option pricing formulas 2020 – 2025

UMB Trading App · Options trading interface for beginners · UI design, Figma, JavaScript 2021

ML Captcha Solver · Image pipeline and scikit-learn classifier, 99.7% on one captcha style 2018

Skills

Languages	Go, Python, TypeScript, JavaScript, C++, C, SQL
Trading	Order execution, market making, WebSockets, NSE option chain data, option pricing, broker APIs
Data & infra	AWS, CloudFormation, Snowflake, Airflow, Kafka, Spark, Docker, Kubernetes, Redis, MongoDB, Linux
